Drakontas to Present at Pictometry FutureView 2010

The Annual Conference, which showcases the latest geospatial and collaboration solutions for government and commercial industries, will be held October 24-27, 2010 in Lake Buena Vista, Florida

CAMDEN, NJ– Drakontas LLC, a software and services company that develops geospatial collaboration tools for the law enforcement and criminal justice communities, announced today that it will participate in a joint presentation with York County, Pennsylvania personnel on Tuesday, October 26, 2010 during Pictometry Inc.’s FutureView Conference in Lake Buena Vista, Florida. FutureView, now in its fourth year, is held annually and highlights the latest geospatial solutions for use by government and commercial industries.

Drakontas’ CEO, Brian Regli, who will co-present in Session #7, *Quick Response Team Applications*, commented, “Drakontas has worked directly with law enforcement and tactical teams over the past several years to develop our situation awareness and geospatial collaboration solution, *DragonForce*[™]. The York County, Pennsylvania Quick Response Team recently became the first agency in the country to adopt *DragonForce*[™] to empower collaboration among their SWAT personnel, which has led to better operational decision-making and increased safety. This partnership has been further enhanced by the integration of Pictometry’s Intelligent Images[®] solution. Together, we are providing a comprehensive, state-of-the-art geospatial collaboration solution for York County and its law enforcement personnel.”

Added Sgt. Craig Losty, the commander of York County’s Quick Response Team, “The ability of an incident command post during a critical tactical situation to track, communicate and enhance team members’ safety has been greatly improved through the use of *DragonForce*[™], as well as Pictometry’s applications.”

About Drakontas LLC

Drakontas, headquartered in Camden, New Jersey, delivers software, technology consulting, and training programs to Federal, state, and local governments, serving defense, law enforcement, criminal justice, and transportation agencies. Drakontas was founded in partnership with Drexel University in 2004 to transition technologies developed at the Applied Communications and Information Networking (ACIN) Center for the Department of Defense to commercial, civilian and homeland security uses.
